Freedonia website SSP introduction

These documents constitute the System Security Plan for the Freedonia "Hello World" application (under development). The contents of this file, (from `markdowns/README.md`) are rendered to appear as the introduction of the SSP by Masonry and GitBook.

A Freedonia SSP (as well as one for USA) comprises:

- Narrative: A narrative description (from `markdowns/README.md` and other content under `markdowns/docs`)
- Standards: A description of standards and relevant controls (generated from *components* and *dependencies/systems* references in the `opencontrol.yaml`)
- Components: Links to details of the components (also generated from `opencontrol.yaml`)

While a README.md may be sufficient to provide a narrative introduction for an SSP, it's likely you'll need to go into more depth. This Freedonia SSP project demonstrates the narrative by placing content and related images in `markdowns/docs`

Version and update information

We have yet to implement a strategy to version this document with a creation date and relevants tags.

The source documents are under source-code control with Git and GitHub at the following URL: <https://github.com/pburkholder/freedonia-compliance>

If there are errors or corrections, please submit them to <https://github.com/pburkholder/ato1day-compliance/issues>.

About the System Security Plan

Lorem ipsum dolor sit amet, te populo denique vim. Ut nam ludus habemus, ne scripta consetetur vel, ad eum vocent expetendis. Sed ut diceret noluisse dissentiet, iriure fabulas pertinacia mea an. Cibo homero ubique at eum, vix nihil deleniti an. Pri omnesque consequat ex, ea mei quas labore moderatius.

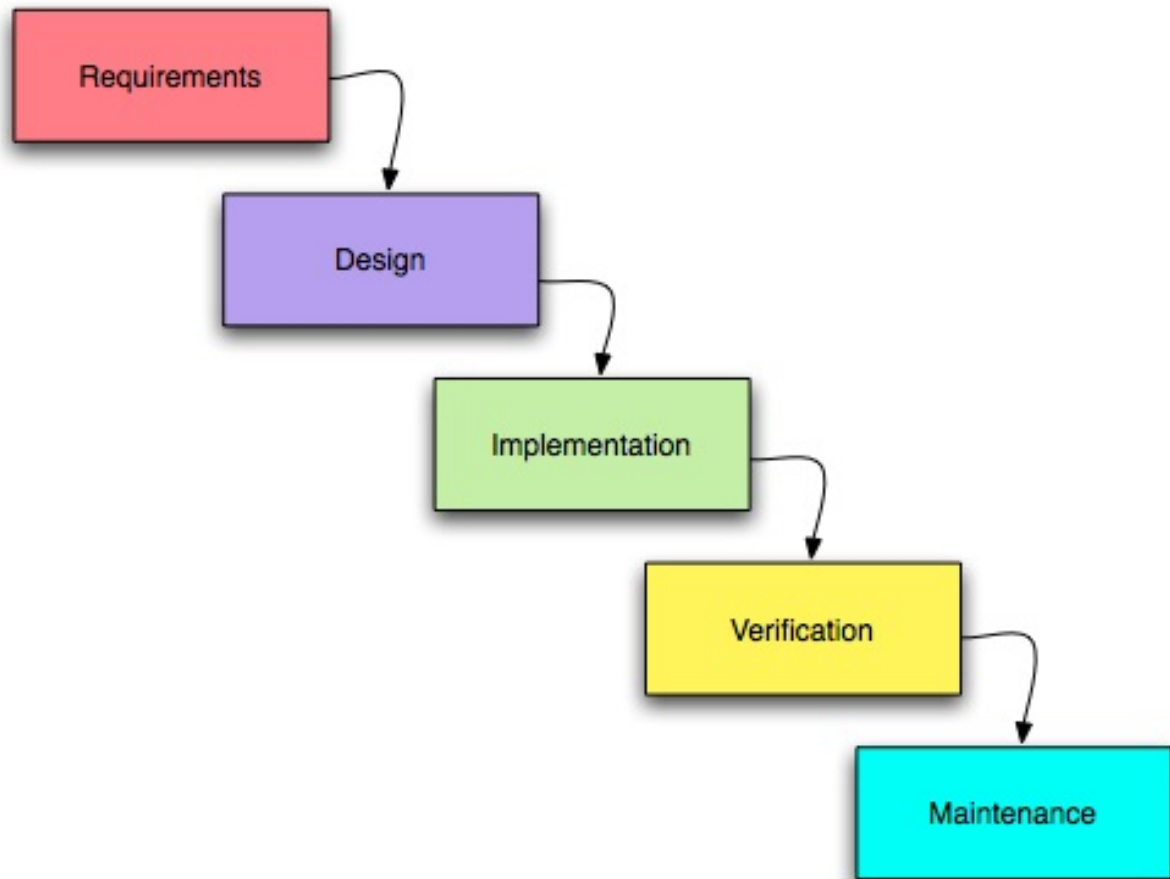

Who should use this document?

In meis impedit offendit vel. Ut utinam soleat usu, porro homero integre ad vel. Legimus efficiantur has ad, velit homero recusabo sea ne, lobortis inimicus recteque eam te. No elit iudicabit imperdiet usu, ut quando voluptatibus ius, legendos corrumpit ius in. Cum vocent gloriatur ex, erat eruditi eu pri.

How are images included?

By including them with Markdown: `![Waterfall SDLC Image](./Waterfall_model.png)`

Like this: Let's not do waterfall:

Audit and Accountability Policy and Procedures

Audit Policy

This text describes how our organization is meeting the requirements for the Audit policy, and also references a more complete description at [./AU_policy/README.md](#)

Since the AU-1 `control` is to document and disseminate a policy on Audit and Accountability, then this narrative suffices to provide that control. A verification step could be something that checks that the referenced policy is no more than 365 days old.
